

Love. Protect. Immunize.

National Infant Immunization Week

The promise is great for a world where all children have a chance for a healthy start to life.

No child should suffer or die from a vaccine-preventable disease. We can protect all children against these terrible diseases. Health care providers must talk with parents about the importance of immunization and answer their questions about vaccine benefits and risks. Every visit is an opportunity to vaccinate. Remind parents before immunizations are due.
