

Instructions for PowerPoint Presentation and Video

Please note that computer setups vary and these instructions may not match your computer. The general idea is to have the video open and ready to play when you reach the appropriate slide in the PowerPoint presentation. The video has sound, so be sure you have speakers.

Insert CD into computer

Click on Play DVD Video, then “OK”, but do not start the video.

Open PowerPoint and the presentation “Refugee Health In-Service...”

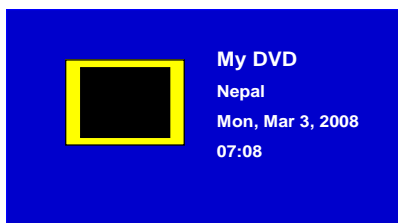

When you get to the “Bhutanese Arrivals” slide in the presentation,

Right click your mouse, or laptop, and click on “Screen”

Click on “Switch Programs”

Click on Windows Media at the bottom of the screen

Click on the black square to start the video or on “Play” if it is visible

Click on View Full Screen icon (upper right corner)

When the video is finished, click on "Close" or hit the "Esc" key to return to the presentation.

If you want to edit the presentation, you will need to save it to your computer to make any changes.
